Diversified CPC International, Incorporated
24338 West Durkee Road | Channahon, IL 60410 | 815-424-2000

Natural Refrigerants - Gas and Liquids Division

DIVERSIFIED CPC INTERNATIONAL is a recognized global leader supplying natural refrigerants to the refrigeration and air conditioning industry. With over 25 years experience and expertise in environmentally-friendly refrigerants, Diversified CPC manufactures and supplies high purity hydrocarbon natural refrigerants to a global market.

- R290 Propane
- R600a Isobutane
- R600 n-Butane
- R1270 Propylene

Natural refrigerants are chemicals which occur in nature's bio-chemical processes. They do not deplete the ozone layer and unlike many synthetic refrigerants that have a high global warming potential, Diversified CPC's high purity hydrocarbon natural refrigerants make negligible contribution to global warming.

DIVERSIFIED CPC INTERNATIONAL's high purity hydrocarbon natural refrigerants are 99.5% pure, low moisture, low sulfur hydrocarbons produced to necessary tolerances. This purity provides for a more stable refrigerant than other hydrocarbon refrigerants available on the market. This directly translates into lower compression energy costs and higher refrigeration rates per horsepower of compression. Detailed specifications are available upon request.

DIVERSIFIED CPC INTERNATIONAL has distribution terminals that can assist you with your bulk chemical needs. To fine tune your distribution requirements, we supply products in tank car, tank truck, ISO containers, and various cylinders.

- Channahon, Illinois
- Sparta, New Jersey
- Anaheim, California
- Petal, Mississippi
- Miami, Florida
