Diversified CPC Int'l

High Purity Propane

High Purity for High Standards

High performance stems from high purity products that are engineered to consistently meet the stringent standards of today's markets. Diversified CPC International is a global leader in the production of refrigerant-grade high purity propane and achieves purity levels that no other manufacturer can match.

Diversified CPC's industry-leading fractionation tower was designed exclusively to produce high purity propane. The manufacturing process dramatically reduces the level of ethane, methane, butanes, moisture, and sulfur to the lowest PPM level available on the market. Our system also yields consistent quality to ensure uniform performance throughout each application.

Formula:	C3H8
Specific Gravity:	.508@60F
Pounds Per Gallon:	4.234@60F
Specifications:	HP 99.5+%
	HPR 99.5+% UL
	UHP 99.99+%

A Variety of Grades for a Variety of Applications

High purity propane is used in a variety of applications, which is why Diversified CPC offers a range of purity grades. Each grade is formulated to specific standards to provide optimal and consistent performance.

High Purity (HP)	99.5+%	Standard grade for refrigeration, carbon deposition, foam blowing, and other processes where a high purity is required to provide a more uniform application result. It is manufactured to remove moisture, sulfur, and contains very low levels of mercury - a requirement in modern refrigeration equipment.
High Purity Refrigeration UL	99.5+% UL	Ideal grade for OEMs, commercial, and domestic refrigeration appliances. We can provide any UL-listed refrigeration grade, which may be necessary for manufacturers who are required to have UL-listed equipment.
Ultra High Purity (UHP)	99.99+%	Preferred grade for standards, deposition research, chemical synthesis research, catalyst research, and other applications where variables must be kept to a minimum to accurately evaluate a process.

Ready to Meet Your Needs

All of our high purity propane products are kept in stock and are available for immediate delivery. Additionally, Diversified CPC has distribution terminals strategically located throughout the U.S. to facilitate the safe and fast delivery of our high performance propanes.

Shipping containers:

Truck Transport: HP, HPR, UHP
(9,000 gallons max)

Half Ton Cylinder: UHP 99.99+%
(100 gallons)

Diversified CPC's fractionation tower, located at our headquarters in Channahon, Il., produces consistent and high purity propane products.

The Diversified Difference

Diversified CPC International is a global leader in the production of the highest quality specialty gases, aerosol propellants, alternative fuels, NGL refrigerants, and foam blowing agents. In addition to providing quality products, we maintain an unprecedented focus on client satisfaction and offer an array of value-added services. Diversified CPC provides safety and operations consultation, storage tank sales and installation, and supply chain management to help clients meet their safety and operational goals.
